

Product Information

Machine Cleaning Items

Product Overview & Key Features

Cleaning and caring for your warewasher is as important as cleaning the glasses and crockery that goes into it. Keeping the warewasher clean will assist in prolonging the life of the machine and eliminates the chance of any debris attaching itself to otherwise clean items.

Clenaware provide a number of items that can be used to assist in keeping your warewasher clean. A good machine cleaning schedule will ensure that your warewasher provides consistent results with every wash.

Dirty wash arms and jets will affect the results of the wash. Cleaware provide specialised brushes which are designed to clean wash and rinse arms and a cleaning tool for keeping the holes in the wash and rinse jets clean and free of debris. Wash and rinse jets can easily become blocked with debris or build up of scale and chemicals.

A specialised cabinet brush should be used to remove any dirt and debris from the wash tank, door, filters and sills. Items can be purchased individually or as part of a machine cleaning kit.

Cabinet Brush

A cabinet brush is a specialist tool for cleaning the inside of the wash tank, door, filters and sills, without scratching the surfaces inside.

Spraybar Cleaning Brush

A spraybar cleaning brush should be used for cleaning the inside of the wash and rinse arms inside your warewasher. The Cleaware spraybar cleaning brush is a specialist tool designed to fit inside the spraybars and give great results every time you clean.

Wash And Rinse Jet Cleaning Tool

A wash and rinse jet cleaning tool should be used for cleaning the inside of jets. Simply remove the jets from the arms and use the specialist tool to clean the jets and remove any debris or build up of scale and chemicals.

Stainless Steel Cleaner

The stainless steel cleaner is a liquid spray which can be used to remove grease and smears from the stainless steel surfaces of your warewasher. Provided in a 750ml trigger spray bottle, the stainless steel cleaner is non tainting and suitable for use on food preparation surfaces.

Bactericidal Cleaner

The bactericidal cleaner is a liquid spray which is safe to use in any commercial kitchen or bar area. Provided in a 750ml trigger spray bottle, the bactericidal cleaner is odour and taint free and kills 99.9% of bacteria.
